

Hot Water Generation - Gas-Fired/Water

ABH Gas-Fired Water Heater

A complete pre-piped condensing high efficiency gas-fired water heater featuring The Brain® Digital Recirculation Valve (DRV). Up to 99.8% efficiency (based on incoming water temperature) with a modulating stainless steel burner and a 5:1 turn down ratio (per heater).

Digital technology, via the DRV, provides precise water temperature control, enhanced user safety, and versatile Building Automation System (BS) connectivity options all in a single-source assembly.

Operational Specifications

- +/-2°F (1°C) DRV water temperature control at peak, moderate or zero fixture demand on hot water system designed for continuous recirculation
- 1°F (1°C) minimum recirculating water temperature differential
- LCD display which indicates: set point, delivered temperature, error codes and alarm conditions capable of BAS and mobile connectivity
- Programmable set point range of 81-158°F (27-70°C) capable of BAS or mobile monitoring and adjustment
- Programmable thermal disinfection range of 158-185°F (70-85°C)
- Programmable 1st level hi/lo temp alarm display capable of BAS or mobile alerting
- Automatic safe closure of hot water inlet in response to: inlet supply failure, 120V power failure, or programmable high temperature error
- Automatic safe closure of hot water inlet powered by a replaceable lithium battery monitored for low-level alerting
- Automatic safe closure response relayed to secondary safety shutoff valve
- Patented Cold Water Injection System (CWIS)

Technical Specifications

- Gas Pressure: Maximum-14" (356mm); Minimum-4" (102mm)
- Minimum recirculation flow: 2 GPM (7 LPM) per DRV25, 5 GPM (19 LPM) per DRV40, 10 GPM (37.9LPM) per DRV80
- Complete assembly lead free compliant
- Pre-piped isolation valves, strainers, check valves, gas piping, venting, condensate piping relief valves, thermometers and pressure gauges
- DRV conforms to ASSE 1017, CSA B125.3-11, UL E357437, and CE
- 120 volt power supply required for DRV; 208-240V, Single Phase for ABH
- Integral MODBUS RTU with connectivity options for Modbus TCP, BACnet, or LonWorks via SAGE®
- ABH conforms to ANSI Z21.13-2014/CSA 4.9-2014; UL795/CSA3.4; AHRI; ASME H Stamped
- Capacities from 199,000BTU/Hr. (58kW) to 2,520,000BTU/Hr (739kW) (additional capacities available upon request).

Standard Materials of Construction

- Heat Exchanger: 316L Stainless Steel
- Water Pipe: Type L Copper
- Fittings: Lead-Free Brass/Bronze
- Digital Mixing Valve: 316L Stainless Steel
- Fabricated Carbon Steel Frame With Machine Grade Enamel Paint
- Venting: Stainless Steel
- Storage Tank: Glass Lined ASME Rated

Connectivity

Integral MODBUS RTU for direct connectivity to BAS, or SAGE®

SAGE® (BS) module available with specific ProtoCessor cards for BAS connectivity to systems which operate on MODBUS TCP, BACnet™, or LonWorks™ protocols. Mobile connectivity features smart hot water system dashboard monitoring, secure remote programming, multi-location view, temperature and system diagnostic alerts, with unlimited digital documentation and automated report generation. Mobile connectivity may be enabled by a customer activated subscription.

Standard Equipment

- 316L stainless steel water tube heat exchanger, 160 psig (11 barg) ASME H
- 5:1 burner modulation
- Self-diagnostic microprocessor controls
- Externally adjustable set point (0–10v)
- Sealed combustion
- AL29-4L vent materials
- Pressure relief valve
- Inlet & outlet water temperature sensor
- Exhaust temperature sensor
- Gas inlet pressure transducer
- Dual high limit sensor (fixed & adjustable)
- Thermal shock proof heat exchanger
- 10yr. limited heat exchanger warranty
- Common venting on multiple units

Equipment only options:

- Cascade controls
- Condensate neutralizer
- Circulating pump

• Rates shown are for natural or propane gas, and elevations up to 9000 feet (2743M)

† Individual appliance piping pressure drop used in the tables is based on 20 feet (6M) of straight pipe, 6 elbows, 2 tees, 2 full port ball valves and 2 unions

* At 97% thermal efficiency with 86°F (30°C) incoming water to heat exchanger

• All recovery rates based on domestic water heating

• Dimensions are approximate. Please consult the factory before installation
