Twin Bolted Plastic Clamp Tube Support

Clamp components mitigate shock and vibration, withstand chemicals and UV light, alleviate stress on system parts, and streamline installation and maintenance.

Contact

If you have questions about this product, please contact your local authorized sales and service center. They can also tell you about supporting services to help you get the most out of your investment.

The complete catalog contents must be reviewed to ensure that the system designer and user make a safe product selection.

When selecting products, the total system design must be considered to ensure safe, trouble-free performance. Function, material compatibility, adequate ratings, proper installation, operation, and maintenance are the responsibilities of the system designer and user.
